# INTEGRATION WITHOUT LIMITATION:
## FOR HOSPITALS, COMMUNITIES & PROVIDERS

Summit Exchange is a powerful, proven and cost-effective interoperability platform to establish seamless data exchange, addressing a wide range of technology, information integration, and automation challenges from the simple to the extremely complex. Exchange uses standards-based interface support, allowing Hospitals, Health Systems, ACOs, Practices, Clinics and Vendors to successfully connect to disparate systems, gather and normalize data, and streamline connectivity, communication, and data interoperability.

This next generation engine leverages our industry knowledge and proven technology, to add in new capabilities, which meet current technology standards, regulatory  standards, and customer expectations into a single streamlined engine. Whether your organization is looking to integrate with ancillary vendors, vendor monitors, physician practices, another Hospital, or an HIE, Exchange delivers a centralized, scalable platform for addressing your interoperability goals.

## PRODUCT DETAILS

### Features & Benefits

* **Enhanced Processor Technology -** *Streamlines interface creation and data manipulation, making routing even easier*
* **Augmented Scalability -** *Improved interface technology will enhance your ability to scale the number and type of interfaces*
* **Additional Monitoring and Alerting -** *Customizable alerts provide a proactive approach to monitoring your environment*
* **New interface diagrams** *- Offers visual, graphical views of your interface landscape*
* **Leverage any protocol or standard:**
  * *Web Services based integration*
  * *IHE ITI integration support*
  * *Integrated HISP and Edge Protocol support, for Direct Secure Messaging*

* **Connect to remote providers, communities, ACOs, HIEs, and/or Public Health Agencies**
* **Centralized Platform Management -** *Enhance the number of external entities your organization is exchanging data with*
* **Integrating Multiple EHRs or Agencies has never been easier and more secure**
  * *Integrate with any Physician EMR System bi-directionally*
  * *Exchange data with any HIE or RLS Provider*
  * *Offers enhanced scalability with multi-deployment support*
  * *Drummond Group ONC-ACB EHR 2015 Edition Certified*

## SUMMIT EXCHANGE DIAGNOSTIC MONITOR

The demands on healthcare IT departments to configure, test, and deliver HL7 interfaces, for sharing mission critical data across patient care, financial and population health analytics systems, continue to grow rapidly. As hospitals look to cost-effectively architect accurate, real-time interoperability across systems, Summit Exchange delivers the technology to effectively leverage specific healthcare formats and messaging standards to address immediate integration goals, while laying the foundation for future initiatives.

## SUMMIT HEALTHCARE PRODUCT SUITE

***Summit Exchange***
Delivers standards-based interface support, allowing Hospitals, Health Systems, Clinics and Vendors to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

***Summit All Access***
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

***Summit EMPI***
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems.

***Summit Scripting Toolkit***
A workflow and task automation tool that can also be used when HL7 methods to deliver data are not an option. Has the ability to handle everything from the simplest script to the most complex interface.

***Summit InSync***
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.

## SIMPLIFY DATA EXCHANGE PROCESSES

- **Comprehensive Scalability** - *Leverage unlimited connection points and deployments, combined with Advanced Performance Handling*

- **Intelligently share** - *Share and recieve care information to support your patient safety and outcome objectives*

- **Maximize ROI** - *Support your operational goals through real-time data exchange delivered at great value*

- **Grow with your community** - *Be able to expand and grow your environment based on your unique community engagement goals*
