Integration & Automation Experts
SUMMIT HEALTHCARE

WE BUILD TECHNOLOGY THAT WORKS THE WAY YOU WISH IT WOULD.

Summit Healthcare offers the healthcare community with a premier suite of tools to address integration, interoperability, patient matching, workflow automation, data management, and business continuity. Designed to work together as a complete solution for organizations using any healthcare information system, each component of the Summit Product Suite can be used independently or in combination to meet the specific needs of your organization.

Summit Healthcare is here to assist your organization when upgrading or migrating your EHR, consolidating your interface landscape, tackling time-consuming manual tasks, dictionary/domain management struggles, duplicate patient record challenges, and downtime requirements. These projects whether short-term or long-term often consume your organizations strategic initiatives and IT department. Consider the advantages of partnering with one integration and automation vendor with extensive healthcare experience. We are proud of our 1,000 clients and 98% customer retention rate.

Learn how you can take control of your healthcare systems integration.

INTEROPERABILITY PLATFORM

EHR adoption and Interoperability is at the forefront of the challenges facing hospitals today. The ability to access and share patient information amongst internal and external systems/entities is key to improving patient outcomes as they move through the continuum of care.
Summit Exchange
Delivers standards-based interface support, allowing you to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

Summit All Access
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

Summit EMPI
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across your ecosystem.

Summit Provider Exchange
An enhanced bi-directional solution, which simplifies patient registration, inbound orders and outbound results between your acute EHR and ambulatory systems.

Summit HealthStore
A single repository for all clinical and administrative data sources across the healthcare enterprise. Retire legacy applications and provide a secure way to seamlessly access data outside your EHR.

AUTOMATION SUITE

Ever-increasing regulations and costs make processes in the healthcare industry complex, time-consuming, and error prone. A hospitals top priority is patient care. Through Robotic Process Automation, hospitals are able to provide faster, better, and more accurate delivery of information resulting enhanced customer service and superior patient care.

Summit Scripting Toolkit
The most versatile and powerful RPA application available in healthcare. From the simplest script to the most complex processes, SST provides a cost-effective solution that enables organizations to

Summit InSync
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.
