

Summit All Access for
**PROVIDER
ALERT**

WEB-BASED SOLUTION FOR REAL-TIME ADT NOTIFICATIONS TO PROVIDERS

CMS now requires hospitals, including psychiatric hospitals and critical access hospitals, to send electronic event notifications of a patient's admission, discharge, and/or transfer, as they happen, to another healthcare facility or community provider/practitioner. Improved data flow between hospital systems and the provider community is a necessity for enabling safe care transitions, improving outcomes, and reducing readmissions. The Summit Provider Alert Solution is a secure communications platform that facilitates care coordination by allowing the entire care team to receive real-time, secure ADT notifications from any workstation or mobile device.

Provider Alert is an easy-to-use, web-based application that empowers providers to proactively reach out to their patients to ensure proper follow-up care after a medical emergency or critical hospital event. Timely outpatient follow-up is promoted when notifications are delivered to ensure all care stakeholders have access to actionable information, which informs decision making and drives post-acute care.

PRODUCT DETAILS

Features & Benefits

Immediate Communication Between Your Hospital and the Care Community

- Improve delivery of patient care through real-time, secure ADT notifications
- Flexible distribution and subscription (secure text, email, direct message)

Enhance Relationships and Extend Community Outreach

- Support provider productivity and efficiency while maximizing reimbursement goals.

Lower Healthcare Costs

- Integrated care team engagement allows for faster follow up and cost reductions through medication reconciliation, proactive post hospital care, and patient education.

Promote Care Coordination

- Enhance care team engagement between patient, primary care provider, referring provider, care coordinator and/or family care team members.

CMS Compliance

- All events and notifications are fully-audited.
- Easily report on percentage of notifications sent to meet attestation guidelines.
- Prevent potential penalties and maximize reimbursements.
- Support care coordination and patient outreach initiatives.

***Failure to comply with the CMS Ruling results in loss of certification and reimbursements.**
