

SUMMIT ALL ACCESS

DATA AVAILABILITY ANYTIME, ANYWHERE

Incomplete data puts patient care and hospital operations at risk. However, most solutions do not display documents in a way that is practical and readily accessible to staff across the healthcare spectrum. Organizations are looking for ways to quickly and securely distribute data *regardless of access to a desktop computer, network, or EHR.*

Summit All Access is the one-stop-shop for strategically managing data access throughout the healthcare enterprise. Securely distribute documents within the organization or grant audited access to documents for community providers. Become a leader in healthcare technology by incorporating the latest tools, data standards, and supporting technologies to accomplish cost-effective innovation in healthcare.

PRODUCT DETAILS

Convenient Access to Data

- Instantly expand your solution to new departments and facilities by granting access to the web portal.
- Intuitive web views make workflows more streamlined for staff and community providers.
- No additional hardware or software for staff or community providers to install.

Secure and Fully Auditable

- All processed data is automatically encrypted to HIPAA standards.
- Export comprehensive user audit logs of who, when, why, and how any document is viewed or printed.

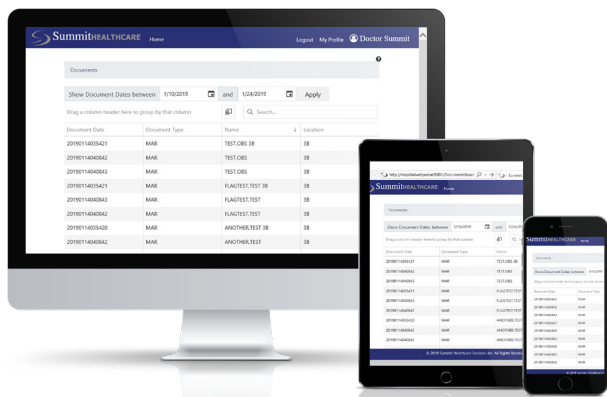

Easy to Scale and Manage

- Easy to Scale and Manage
- Leverage real-time HL7 feeds, PDF reports, and other standards to power your enterprise-wide innovations.
- Add new users through Active Directory or through one-click sign-up via the web.
- Support your IT staff's on-the-go needs with email alerts and mobile device remote monitoring tools.
- Produce system reports to analyze performance and efficiency trends throughout your entire system.

ROI: Cost Savings

- Free up FTEs by using scheduling tools to automate manual tasks.
- Leverage on-demand access to data to reduce preventable readmissions and improve outcomes.
- Reduce paper transaction costs from faxing and mailing.

SUMMIT ALL ACCESS

Summit Healthcare's All Access solutions allows you to quickly and easily share timely information to providers when it's needed to improve patient outcomes and care continuity. Information sharing can be combined with notifications for providers, who want to be updated regularly on patient events they care about. Value-based care delivery requires physicians and providers to monitor patients throughout the continuum of care, not simply when they're in the practice for a scheduled appointment.

Empower community providers with on-demand data access without giving full EHR permissions, while experiencing peace of mind knowing that all processed data is automatically encrypted to HIPAA standards.

SUMMIT HEALTHCARE PRODUCT SUITE

Summit Exchange
Delivers standards-based interface support, allowing Hospitals, Health Systems, Clinics and Vendors to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

Summit All Access
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

Summit EMPI
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems.

Summit Scripting Toolkit
A workflow and task automation tool that can also be used when HL7 methods to deliver data are not an option. Has the ability to handle everything from the simplest script to the most complex interface.

Summit InSync
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.

IT STAFF

- Low cost integration with your community
- Secure Data availability with your providers
- Easy 1-click sign up for community providers
- Share meaningful patient information from any system

HIM STAFF

- No delays in getting providers information
- Labor free processing of patient records to providers
- Reduce paper transaction costs from faxing & mailing
- Auditing of user events mitigate any security risks

PROVIDERS

- Improve patient care with direct access to patient hospital data
- Notifications when providers want and need them
- Support care collaboration through electronic consults
- Increase reimbursement opportunities through early intervention
