HEALTHCARE SYSTEMS GROUP

A COMPREHENSIVE VIEW OF EACH PATIENT

Do you have a solution in place that prevents costly patient identity errors? Patient matching issues that result in duplicate records cost hospitals $1.5M a year, an average of $1,950 per patient*. Ensure you have a clean system with clean data by using a comprehensive Enterprise Master Patient Index (EMPI) solution that has a 99.0% precision score**.

Summit Healthcare has partnered with Dedalus Health Systems Group to offer an Enterprise Master Patient Index (EMPI) solution. Summit EMPI provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems and ensures uniqueness of each patient's chart. Supporting multiple patient domains and MPI federations, EMPI makes patient information continually available to internal and external consumers.

PRODUCT DETAILS

Benefits

- *Access a clean set of reliable patient data*
  Scrub massive patient data sets to remove redundancies and identify duplicate records
- *Promote patient safety initiatives*
  Ensures clinicians have an accurate, comprehensive view of a patient's medical history
- *Establishes a common patient identifier*
- *Immediate ROI*
  Reduces financial delays and denied medical claims with accurate billing and reimbursements

Features
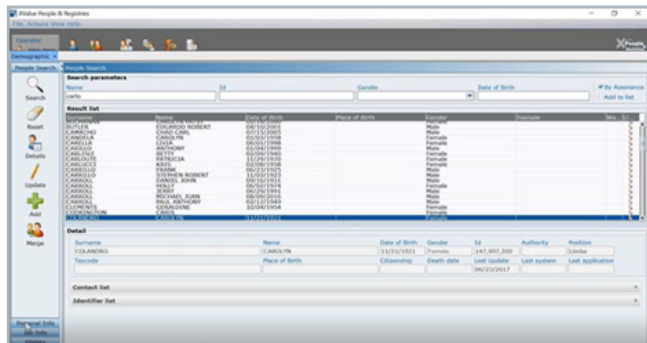

- *Automate the duplicate record clean-up process*
  Establishes a common patient identifier for cross-platform interoperability and accurate data exchange
- *Allows for exchange of data as you move HIS platforms*
  Removes the need to cleanse, process or store redundant information, reducing costs
- *Handles any EHR platform and ancillary systems*
  Supports multiple facility setup; Connect to all HCIS vendors, including MEDITECH, Allscripts, Cerner, Athena, Epic, eClinicalWorks
- *Powerful discrepancy reports*
  Analyze matching and decide which data is kept as a "source of truth" within your enterprise

SUMMIT EMPI DASHBOARD

Summit Healthcare's EMPI solution, powered by Dedalus, provides a comprehensive view of each patient by pulling pertinent data from all ancillary systems into one dashboard. Watch the video to learn more.

SUMMIT HEALTHCARE PRODUCT SUITE

Summit Exchange
Delivers standards-based interface support, allowing Hospitals, Health Systems, Clinics and Vendors to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

Summit All Access
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

Summit EMPI
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems.

Summit Provider Exchange
An enhanced bi-directional physician office integration solution, which simplifies patient registration, inbound orders and outbound results between your hospital EHR and ambulatory systems.

Summit Scripting Toolkit
The most versatile and powerful RPA application available in healthcare. From the simplest script to the most complex processes, SST provides a cost-effective solution that enables organizations to streamline workflows and increase efficiencies organization-wide.

Summit InSync
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.

YOUR EHR IS ONLY AS GOOD AS THE INFORMATION RUNNING THROUGH IT

According to a study by Black Book*, research shows:

8-12%	$1,950	33%	100,000
Average number of duplicates in an organization's EHR	Cost of each duplicate, per patient	Claims denied due to inaccurate patient information	Number of people who die annually due to mistaken identity
