

Summit Healthcare's MEDITECH Expansive Migration Pathway

Whether you are new to MEDITECH, or migrating from Magic, CS, or 6.x, Summit Healthcare can provide you with all the tools and services to be successful. Summit Healthcare is an expert in all platforms of MEDITECH with over 1,000 customers and 15+ years experience with the MEDITECH HIS.

Now is the time to map and build a tactical and strategic migration strategy to ensure you have the right technology in place while adhering to your migration project budget. As your organization looks to achieve clinical transformation and deliver the highest patient care, evaluating your integration and automation strategy should be a priority, not an afterthought. The results will be a new system designed and implemented to improve patient safety, achieve end-user acceptance, and give you guaranteed cost savings.

"Switching interface engines in the middle of a MEDITECH upgrade in itself is very complicated. With Summit Healthcare in the middle, we didn't even feel any burden when it came to interface development. It was a very streamlined process, as Summit staff worked quietly and effectively in the background."

- Arek Shennar,
Director, Information Services
Cody Regional Network

What You Need:

Clinical & Financial Data Conversions

Moving your data into new systems can be a daunting task

Dictionary Management & Migration

By utilizing dictionary synchronization from the start, you can feel confident that all of your data has migrated successfully while providing a long-term maintenance tool!

Integration Strategies

Now is the time to evaluate your current and future integration state. Make sure you are achieving the full value of your MEDITECH migration.

Script Writing

Re-writing your scripts into MEDITECH Expanse is a very important part of your migration project. But it can also be very time consuming.

Business Continuity Planning

Make sure critical patient data is available at all times as you migrate towards your MEDITECH Expanse environment.

How Summit Can Help:

Summit Professional Services will provide data extraction, migration and archival options that supplement standard MEDITECH conversion options.

Summit InSync Services help to guide you through each step of dictionary extraction, analysis, and automation updates.

Summit Integration Services provide a detailed audit of your current integration landscape, and review future projects to determine if any new technology will be needed to accomplish future initiatives:

- Physician Office Integration
- Clinical Document Exchange
- Monitoring Device Integration

Summit Scripting Tool has been developed with the MEDITECH Expanse platform in mind. **Summit Scripting Services** can be utilized to review your overall scripting environment and re-write your scripts so your resources can focus on other components of the migration project.

Summit Downtime Reporting Services Provide an enterprise wide solution to help in the event of a system or network downtime.
