

SUMMIT PROVIDER EXCHANGE

PHYSICIAN OFFICE INTEGRATION MADE EASY

Hospitals have to deal with the ever growing challenges of provider office integration. Summit Provider Exchange facilitates the integration of bi-directional patient ADT, orders and results data between hospital systems and the EMR at the physician office or clinic. With painless customization, mapping and smart routing of data, Summit Healthcare can accommodate any configuration regardless of EMR system. The results are improved patient care, significant cost savings, enhanced productivity, and better physician relations.

Summit Healthcare's scalable solution provides the ability to connect to an unlimited number of offices and add EMR systems at any juncture. With strong order and registration management the hospital staff will have control over the physician office orders and ensure the patient has a hospital medical record for processing. The smooth information flow delivered by the Summit Provider Exchange between a hospital and practice enables a range of efficiencies and quality benefits.

PRODUCT DETAILS

Benefits

- **Shorter Development Cycles** - Bring interfaces live quickly using one application.
- **Lessened episodes in delays of care** - Brings instantaneous information-sharing technology between health care organizations.
- **Enhanced patient care** - Provides quicker access to critical data for rapid decision making, greater productivity and decreased errors.
- *Integrating Physician Offices and Hospital systems contribute to achieving Promoting Interoperability Reuirements*

Features

- **Bi-directional communication** - With the automation of order entry, order results and order statuses you get the most from your integration.
- **Secure data transmission** - Provider Exchange ensures private information remains in the view of accepted personnel only.
- **Real-time interoperability** - The ability for records to be updated in real-time results in "meaningful use" of your EMR.
- **Advanced order viewing** - Users can sort orders by date, order number and test type and can search for orders.

Highlights

- Integrates with any Physician EMR system (NextGen, Allscripts, eClinicalWorks..)
- Works with all EHR vendor platforms; supports all inbound orders interfaces
- On demand patient registration
- Automatic or client parameter control for order release- you decide
- Click to match pending orders - easily process all orders

SUMMIT HEALTHCARE PRODUCT SUITE

Summit Exchange
Delivers standards-based interface support, allowing Hospitals, Health Systems, Clinics and Vendors to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

Summit All Access
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

Summit EMPI
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems.

Summit Provider Exchange
An enhanced bi-directional physician office integration solution, which simplifies patient registration, inbound orders and outbound results between your hospital EHR and ambulatory systems.

Summit Scripting Toolkit
The most versatile and powerful RPA application available in healthcare. From the simplest script to the most complex processes, SST provides a cost-effective solution that enables organizations to streamline workflows and increase efficiencies organization-wide.

Summit InSync
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.
