

## YOUR HOSPITAL LANDSCAPE, AT YOUR FINGERTIPS:

MONITOR, MANAGE, AND REPORT ON ACTIVITY HAPPENING WITHIN YOUR INTEGRATION ENVIRONMENT ON-THE-GO, FROM ANYWHERE, AT ANYTIME

The demands on healthcare IT departments to configure, test, and deliver HL7 interfaces continue to grow rapidly. As hospitals look to cost-effectively architect accurate, streamlined, and real-time interoperability across systems, Summit Exchange provides the next generation of technology for sharing mission critical data across patient care, financial, and population health analytics systems.

The Summit Exchange Dashboard removes the need for analysts to log into or be directly connected to the server running Summit Exchange. It provides an overview of the system health, information on recent or pending transactions, and allows troubleshooting on the fly when alerted to an issue.

### PRODUCT FEATURES

#### Interface Management On-The-Go

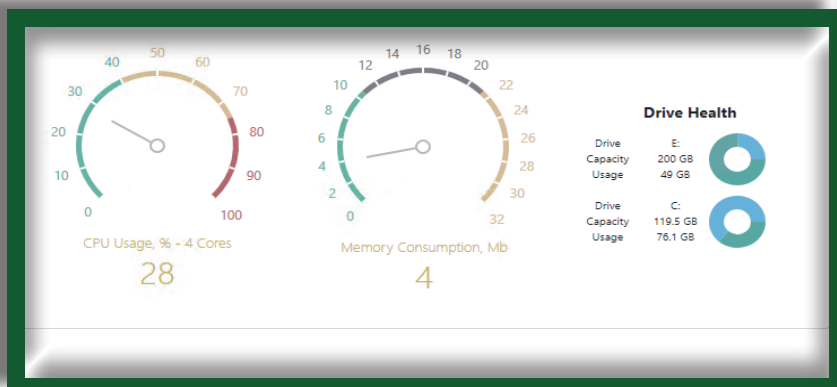

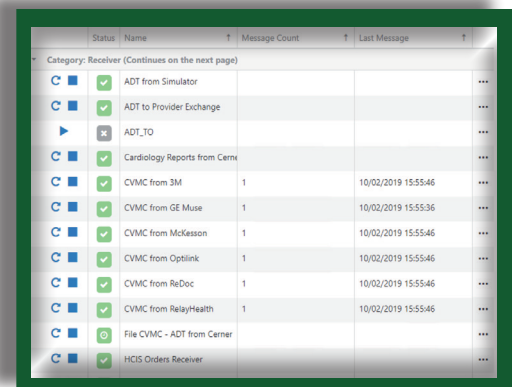

Connect from anywhere, from any device

- Mobile enabled access
- Secure and Audited access
- Restart/Enable/Disable components

#### Real-time Status

Up to the minute information for ease of mind

- Queued messages
- Message processing activity
- Color coded status information
- Last started/restarted information
- Server health

| Status | Name                           | Message Count | Last Message        |
|--------|--------------------------------|---------------|---------------------|
| ✓      | ADT from Simulator             |               |                     |
| ✓      | ADT to Provider Exchange       |               |                     |
| ✗      | ADT_TO                         |               |                     |
| ✓      | Cardiology Reports from Cerner |               |                     |
| ✓      | CVMC from 3M                   | 1             | 10/02/2019 15:55:46 |
| ✓      | CVMC from GE Muse              | 1             | 10/02/2019 15:55:36 |
| ✓      | CVMC from McKesson             | 1             | 10/02/2019 15:55:46 |
| ✓      | CVMC from Optink               | 1             | 10/02/2019 15:55:46 |
| ✓      | CVMC from ReDoc                | 1             | 10/02/2019 15:55:46 |
| ✓      | CVMC from RelayHealth          | 1             | 10/02/2019 15:55:46 |
| ⊗      | File CVMC - ADT from Cerner    |               |                     |
| ✓      | HGIS Orders Receiver           |               |                     |
